

DEALING WITH INFECTIOUS DISEASES POLICY

Mandatory – Quality Area 2

PURPOSE

This policy will provide clear guidelines and procedures to follow when:

- a child attending North Brighton Kindergarten shows symptoms of an infectious disease
- a child at North Brighton Kindergarten has been diagnosed with an infectious disease
- managing and minimising the spread of infectious diseases, illnesses and infestations (including head lice)
- managing and minimising infections relating to blood-borne viruses.

Note: This policy includes information on child immunisation.

POLICY STATEMENT

1. VALUES

North Brighton Kindergarten is committed to:

- providing a safe and healthy environment for all children, staff and any other persons attending the service
- responding to the needs of the child or adult who presents with symptoms of an infectious disease or infestation while attending the service
- complying with current exclusion schedules and guidelines set by the Department of Health
- providing up-to-date information and resources for families and staff regarding protection of all children from infectious diseases and blood-borne viruses, management of infestations and immunisation programs.

North Brighton Kindergarten supports the Immunise Australia Program and National Immunisation Program (NIP), which is currently recommended by the National Health and Medical Research Council (NHMRC) and supported by the Commonwealth Government. All educators/staff at North Brighton Kindergarten are committed to preventing the spread of vaccine-preventable diseases through simple hygiene practices such as hand washing, effective cleaning procedures and assessing acceptable immunisation documentation and complying with recommended exclusion guidelines and timeframes for children and educators/staff.

2. SCOPE

This policy applies to the Approved Provider, Persons with Management or Control, Nominated Supervisor, Persons in day-to-day Charge, staff, students on placement, volunteers, parents/guardians, children and others attending the programs and activities of North Brighton Kindergarten, including during offsite excursions and activities.

3. BACKGROUND AND LEGISLATION

Background

Infectious diseases are common in children. Children are at a greater risk of exposure to infections in a children's service than at home due to the amount of time spent with a large number of other children. Infectious diseases are divided into four categories (A, B, C, D) on the basis of the method of notification and the information required. The Department of Health publishes the *Minimum Period of Exclusion from Primary Schools and Children's Services Centres for Infectious Diseases Cases and Contacts*, to assist in protecting the public by preventing, or containing, outbreaks of infectious conditions common in schools and other children's services and is regulated by the *Public Health and Wellbeing Regulations 2009*.

An approved service must take reasonable steps to prevent the spread of infectious diseases at the service, and ensure that the parent/guardian, authorised nominee or emergency contact of each child enrolled at the service is notified of the occurrence of an infectious disease as soon as possible. The

service must have policies and procedures in place for dealing with infectious diseases (Regulation 88). The service has a duty of care to ensure that everyone attending the service is provided with a high level of protection during all hours that the service is in operation. Protection can include:

- notifying children, families and educators/staff when an excludable illness/disease is detected at the service
- complying with relevant health department exclusion guidelines
- increasing educator/staff awareness of cross-infection through physical contact with others.

The Victorian Government offers an immunisation program for children to assist in preventing the spread of infectious diseases.

Early childhood education and care services that are regulated under the *Education and Care Services National Law Act 2010* have legislative responsibilities under the *Public Health and Wellbeing Act 2008* to only offer a confirmed place in their programs to children with acceptable immunisation documentation (refer to *Definitions*).

Legislation and standards

Relevant legislation and standards include but are not limited to:

- *Education and Care Services National Law Act 2010*
- *Education and Care Services National Regulations 2011: Regulation 88*
- *Family Assistance Legislation Amendment (Child Care Rebate) Act 2011*
- *Health Records Act 2001*
- *Information Privacy Act 2000 (Vic)*
 - *National Quality Standard, Quality Area 2: Children's Health and Safety*
 - *National Quality Standard, Quality Area 6: Collaborative Partnerships with Families and Communities*
- *Occupational Health and Safety Act 2004*
- *Privacy Act 1988 (Cth)*
- *Public Health and Wellbeing Act 2008*
- *Public Health and Wellbeing Amendment (No Jab, No Play) Regulations 2015 (Vic)*
- *Public Health and Wellbeing Regulations 2009*

4. DEFINITIONS

The terms defined in this section relate specifically to this policy. For commonly used terms e.g. Approved Provider, Nominated Supervisor, Regulatory Authority etc. refer to the *General Definitions* section of this manual.

Acceptable immunisation documentation: documentation as defined by the *Immunisation Enrolment Toolkit for early childhood education and care services* as acceptable evidence that a child is fully vaccinated for their age, or is on a recognised catch-up schedule if their child has fallen behind their vaccinations; or has a medical reason not to be vaccinated; or has been assessed as being eligible for a 16-week grace period.

Blood-borne virus (BBV): A virus that is spread when blood from an infected person enters another person's bloodstream. Examples of blood-borne viruses include human immunodeficiency virus (HIV), hepatitis B, hepatitis C and viral haemorrhagic fevers. Where basic hygiene, safety, infection control and first aid procedures are followed, the risks of contracting a blood-borne virus are negligible.

Communicable Disease and Prevention Control Unit: Responsibility for communication and advice in relation to infectious diseases on behalf of the Secretary of the Victorian Department of Health and Human Services. The unit must be contacted by telephone on 1300 651 160.

Exclusion: Inability to attend or participate in the program at the service.

Illness: Any sickness and/or associated symptoms that affect the child's normal participation in the program at the service.

Infection: The invasion and multiplication of micro-organisms in bodily tissue.

Infestation: The lodgement, development and reproduction of arthropods (such as head lice), either on the surface of the body of humans or animals, or in clothing.

Infectious disease: An infectious disease designated by the Communicable Disease and Prevention Control Unit (refer to *Definitions*), Victorian Department of Health and Human Services in Schedule 7 of the *Public Health and Wellbeing Regulations 2009*, the Minimum Period of Exclusion from Primary Schools and Children's Services Centres for Infectious Diseases Cases and Contacts.

Medication: Any substance, as defined in the *Therapeutic Goods Act 1989* (Cth), that is administered for the treatment of an illness or medical condition.

Pediculosis: Infestation of head lice that is transmitted by having head-to-head contact with another person who has head lice. Pediculosis does not contribute to the spread of any infectious diseases, and outbreaks of this condition are common in schools and childcare facilities.

Minimum exclusion period: The period recommended by the Communicable Disease and Prevention Control Unit (see *Definitions*) Victorian Department of Health and Human Services for excluding any person from attending a children's service to prevent the spread of infectious diseases as specified in Schedule 7 of the *Public Health and Wellbeing Regulations 2009*, the Minimum Period of Exclusion from Primary Schools and Children's Services Centres for Infectious Diseases Cases and Contacts. The exclusion period table, published by the Department of Health and Human Services, can be accessed at (<http://docs.health.vic.gov.au/docs/doc/Minimum-Period-of-Exclusion-from-Primary-Schools-and-Childrens-Services-Centres-for-Infectious-Diseases-Cases-and-Contacts>).

Serious incident: A serious incident (regulation 12) is defined as any of the following:

- the death of a child while being educated and cared for at the service or following an incident at the service
- any incident involving serious injury or trauma while the child is being educated and cared for, which
 - a reasonable person would consider required urgent medical attention from a registered medical practitioner; or
 - the child attended or ought reasonably to have attended a hospital e.g. a broken limb*
- any incident involving serious illness of a child while that child is being educated and cared for by a service for which the child attended, or ought reasonably to have attended, a hospital e.g. severe asthma attack, seizure or anaphylaxis*.
 - *NOTE: In some cases, (for example rural and remote locations) a General Practitioner conducts consultation from the hospital site. Only treatment related to serious injury or illness or trauma are required to be notified, not other health matters.
- any emergency for which emergency services attended. NOTE: This means an incident, situation or event where there is an imminent or severe risk to the health, safety or wellbeing of a person/s at an education and care service. It does not mean an incident where emergency services attended as a precaution.
- a child appears to be missing or cannot be accounted for at the service
- a child appears to have been taken or removed from the service in a manner that contravenes the National Regulations
- a child was mistakenly locked in or out of the service premises or any part of the premises.

Examples of serious incidents include amputation (e.g. removal of fingers), anaphylactic reaction requiring hospitalisation, asthma requiring hospitalisation, broken bone/fractures, bronchiolitis, burns, diarrhoea requiring hospitalisation, epileptic seizures, head injuries, measles, meningococcal infection, sexual assault, witnessing violence or a frightening event.

If the approved provider is not aware that the incident was serious until sometime after the incident, they must notify the regulatory authority within 24 hours of becoming aware that the incident was serious.

Notifications of serious incidents should be made through the NQT IT System portal (<http://www.acecqa.gov.au>). If this is not practicable, the notification can be made initially in whatever way is best in the circumstances.

PROCEDURES

The Approved Provider and Persons with Management or Control are responsible for:

- ensuring that where there is an occurrence of an infectious disease at the service, reasonable steps are taken to prevent the spread of that infectious disease (Regulation 88(1))
- ensuring that where there is an occurrence of an infectious disease at the service, a parent/guardian or authorised emergency contact of each child at the service is notified of the occurrence as soon as is practicable (Regulation 88(2))
- ensuring that information from the Department of Health about the recommended minimum exclusion periods (refer to *Definitions*) is displayed at the service and is available to all stakeholders including staff, parents/guardians, students and volunteers

- contacting the parent/guardian and Communicable Disease Prevention and Control Unit (refer to Definitions) within 24 hours if on reasonable grounds, the Approved Provider believes that a child enrolled at the service is suffering from a vaccine-preventable disease being:
 - a) Pertussis, or
 - b) Poliomyelitis, or
 - c) Measles, or
 - d) Mumps, or
 - e) Rubella, or
 - f) Meningococcal C,
- as required under Regulation 84(2) of the *Public Health and Wellbeing Regulations 2009*
- ensuring that a child is excluded from the service in accordance with the recommended minimum exclusion periods (refer to Definitions) when informed that the child is infected with an infectious disease (refer to Definitions) or has been in contact with a person who is infected with an infectious disease (refer to Definitions) as required under Regulation 85(1) of the *Public Health and Wellbeing Regulations 2009*
- contacting the Communicable Disease Prevention and Control Unit (refer to Definitions) – if there is an outbreak of three or more cases of respiratory illness at the service within a 72-hour period, and/or if there is an outbreak of two or more cases of gastrointestinal illness in a 48-hour period.
- ensuring children who are offered a confirmed place have acceptable immunisation documentation (refer to Definitions)
- ensuring when directed by the Secretary, that a child who is not immunised against a vaccine-preventable disease does not attend the service until the Communicable Disease Prevention and Control Unit (refer to Definitions) directs that such attendance can be resumed (Regulation 85(2) of the *Public Health and Wellbeing Regulations 2009*)
-
- notifying DET within 24 hours of a serious incident (refer to Definitions)
- supporting the Nominated Supervisor and the educators/staff at the service to implement the requirements of the recommended minimum exclusion periods
- ensuring information about immunisation legislation is displayed and is available to all stakeholders (refer to: www.health.vic.gov.au/immunisation/factsheets/schedule-victoria.htm)
- conducting a thorough inspection of the service on a regular basis, and consulting with educators/staff to assess any risks by identifying the hazards and potential sources of infection
- ensuring that the Nominated Supervisor, staff and everyone at the service adheres to the *Hygiene Policy* and the procedures for infection control relating to blood-borne viruses (refer to Attachment 4)
- ensuring that appropriate and current information and resources are provided to educators/staff and parents/guardians regarding the identification and management of infectious diseases, blood-borne viruses and infestations
- keeping informed about current legislation, information, research and best practice
- ensuring that any changes to the exclusion table or immunisation schedule are communicated to educators/staff and parents/guardians in a timely manner.

The Nominated Supervisor and Persons in Day-to-Day Charge is responsible for:

- ensuring that where there is an occurrence of an infectious disease at the service, reasonable steps are taken to prevent the spread of that infectious disease (Regulation 88(1))
- ensuring that where there is an occurrence of an infectious disease at the service, a parent/guardian or authorised emergency contact of each child at the service is notified of the occurrence as soon as is practicable (Regulation 88(2))
- ensuring that information from the Department of Health Services about the recommended minimum exclusion periods (refer to Definitions) is displayed at the service and is available to all stakeholders including staff, parents/guardians, students and volunteers
- contacting the parent/guardian and Communicable Disease Prevention and Control Unit (refer to Definitions) within 24 hours if on reasonable grounds, the Approved Provider believes that a child enrolled at the services is suffering from a vaccine-preventable disease being:
 - g) Pertussis, or

- h) Poliomyelitis, or
- i) Measles, or
- j) Mumps, or
- k) Rubella, or
- l) Meningococcal C

as required under Regulation 84(2) of the *Public Health and Wellbeing Regulations 2009*

- ensuring that a child is excluded from the service in accordance with the recommended minimum exclusion periods (refer to *Definitions*) when informed that the child is infected with an infectious disease (refer to *Definitions*) or has been in contact with a person who is infected with an infectious disease (refer to *Definitions*) as required under Regulation 85(1) of the *Public Health and Wellbeing Regulations 2009*
- contacting the Communicable Disease Prevention and Control Unit (refer to *Definitions*) – if there is an outbreak of three or more cases of respiratory illness at the service within a 72-hour period, and/or if there is an outbreak of two or more cases of gastrointestinal illness in a 48-hour period.
- ensuring that a minimum of one educator with current approved first aid qualifications is in attendance and immediately available at all times the service is in operation (refer to *Administration of First Aid Policy*). (As a demonstration of duty of care and best practice, ELAA recommends that **all educators** have current approved first aid qualifications and anaphylaxis management training and asthma management training.)
- establishing good hygiene and infection control procedures, and ensuring that they are adhered to by everyone at the service (refer to *Hygiene Policy* and Attachment 4 – Procedures for infection control relating to blood-borne viruses)
- ensuring the exclusion requirements for infectious diseases are adhered to as per the recommended minimum exclusion periods (refer to *Definitions*), notifying the Approved Provider and parents/guardians of any outbreak of infectious disease at the service, and displaying this information in a prominent position
- advising parents/guardians on enrolment that the recommended minimum exclusion periods will be observed in regard to the outbreak of any infectious diseases or infestations (refer to: <http://docs.health.vic.gov.au/docs/doc/Minimum-Period-of-Exclusion-from-Primary-Schools-and-Childrens-Services-Centres-for-Infectious-Diseases-Cases-and-Contacts>)
- advising the parents/guardians of a child who is not fully immunised on enrolment that they will be required to keep their child at home when an infectious disease is diagnosed at the service, and until there are no more occurrences of that disease and the exclusion period has ceased
- requesting that parents/guardians notify the service if their child has, or is suspected of having, an infectious disease or infestation
- providing information and resources to parents/guardians to assist in the identification and management of infectious diseases and infestations
- providing a head lice notification letter (Attachment 3) to all parents/guardians when an infestation of head lice has been detected at the service
- maintaining confidentiality at all times (refer to *Privacy and Confidentiality Policy*).
-

All other educators are responsible for:

- encouraging parents/guardians to notify the service if their child has an infectious disease or infestation
- observing signs and symptoms of children who may appear unwell, and informing the Nominated Supervisor
- providing access to information and resources for parents/guardians to assist in the identification and management of infectious diseases and infestations
- monitoring any symptoms in children that may indicate the presence of an infectious disease and taking appropriate measures to minimise cross-infection
- complying with the *Hygiene Policy* of the service and the procedures for infection control relating to blood-borne viruses (refer to Attachment 4)
- maintaining confidentiality at all times (refer to *Privacy and Confidentiality Policy*).

Parents/guardians are responsible for:

- keeping their child/ren at home if they are unwell or have an excludable infectious disease
- informing the Approved Provider, Nominated Supervisor or Person in day-to-day Charge as soon as practicable if their child has an infectious disease (refer to Definitions) or has been in contact with a person who has an infectious disease (Regulation 84(1) of the Public Health and Wellbeing Regulations 2009) and providing acceptable immunisation documentation for their child
- complying with the recommended minimum exclusion periods (refer to Definitions) or as directed by the Approved Provider or Nominated Supervisor in consultation with the Communicable Disease Prevention and Control Unit (refer to Definitions)
- where a child is on an immunisation catch-up schedule, ensuring that the child's immunisations are updated in line with the schedule and providing acceptable immunisation documentation to the service
- regularly checking their child's hair for head lice or lice eggs, regularly inspecting all household members, and treating any infestations as necessary
- notifying the service if head lice or lice eggs have been found in their child's hair and when treatment was commenced
- complying with the *Hygiene Policy* and the procedures for infection control relating to blood-borne viruses (refer to Attachment 4) when in attendance at the service.

Volunteers and students, while at the service, are responsible for following this policy and its procedures.

EVALUATION

In order to assess whether the values and purposes of the policy have been achieved, the Approved Provider will:

- regularly seek feedback from educators, staff, parents/guardians, children, management and all affected by the policy regarding its effectiveness
- monitor the implementation, compliance, complaints and incidents in relation to this policy
- ensure that all information related to infectious diseases on display and supplied to parents/guardians is current
- keep the policy up to date with current legislation, research, policy and best practice
- revise the policy and procedures as part of the service's policy review cycle, or as required
- notify parents/guardians at least 14 days before making any change to this policy or its procedures, unless a lesser period is necessary because of a risk.

ATTACHMENTS

- Attachment 1: *Communicable diseases exclusion table (2009)*
- Attachment 2: Head lice notification letter
- Attachment 3: Procedures for infection control relating to blood-borne viruses

AUTHORISATION

This policy was adopted by the Approved Provider of North Brighton Kindergarten on 23rd July 2018.

REVIEW DATE: JULY 2020

ATTACHMENT 1

Minimum period of exclusion from primary schools and children's services centres for infectious diseases cases and contacts

health

Public Health and Wellbeing Regulations 2009

Schedule 7

Minimum Period of Exclusion from Primary Schools and Children's Services Centres for Infectious Diseases Cases and Contacts (Public Health and Wellbeing Regulations 2009).

In this Schedule, medical certificate means a certificate from a registered medical practitioner.

[1] Conditions	[2] Exclusion of cases	[3] Exclusion of Contacts
Amoebiasis (<i>Entamoeba histolytica</i>)	Exclude until there has not been a loose bowel motion for 24 hours	Not excluded
Campylobacter	Exclude until there has not been a loose bowel motion for 24 hours	Not excluded
Chickenpox	Exclude until all blisters have dried. This is usually at least 5 days after the rash appears in unimmunised children, but may be less in previously immunised children	Any child with an immune deficiency (for example, leukaemia) or receiving chemotherapy should be excluded for their own protection. Otherwise not excluded
Conjunctivitis	Exclude until discharge from eyes has ceased	Not excluded
Diarrhoea	Exclude until there has not been a loose bowel motion for 24 hours	Not excluded
Diphtheria	Exclude until medical certificate of recovery is received following at least two negative throat swabs, the first not less than 24 hours after finishing a course of antibiotics and the other 48 hours later	Exclude family/household contacts until cleared to return by the Secretary
Hand, Foot and Mouth disease	Exclude until all blisters have dried	Not excluded
Haemophilus influenzae type b (Hib)	Exclude until at least 4 days of appropriate antibiotic treatment has been completed	Not excluded
Hepatitis A	Exclude until a medical certificate of recovery is received, but not before 7 days after the onset of jaundice or illness	Not excluded
Hepatitis B	Exclusion is not necessary	Not excluded
Hepatitis C	Exclusion is not necessary	Not excluded
Herpes (cold sores)	Young children unable to comply with good hygiene practices should be excluded while the lesion is weeping. Lesions to be covered by dressing, where possible	Not excluded
Human immuno-deficiency virus infection (HIV/AIDS virus)	Exclusion is not necessary	Not excluded
Impetigo	Exclude until appropriate treatment has commenced. Sores on exposed surfaces must be covered with a watertight dressing	Not excluded
Influenza and influenza like illnesses	Exclude until well	Not excluded unless considered necessary by the Secretary
Leprosy	Exclude until approval to return has been given by the Secretary	Not excluded
Measles*	Exclude for at least 4 days after onset of rash	Immunised contacts not excluded. Unimmunised contacts should be excluded until 14 days after the first day of appearance of rash in the last case. If unimmunised contacts are vaccinated within 72 hours of their first contact with the first case, or received NHIG within 144 hours of exposure, they may return to the facility
Meningitis (bacteria – other than meningococcal meningitis)	Exclude until well	Not excluded
Meningococcal infection*	Exclude until adequate carrier eradication therapy has been completed	Not excluded if receiving carrier eradication therapy
Mumps*	Exclude for 9 days or until swelling goes down (whichever is sooner)	Not excluded
Pertussis* (Whooping cough)	Exclude the child for 21 days after the onset of cough or until they have completed 5 days of a course of antibiotic treatment	Contacts aged less than 7 years in the same room as the case who have not received three effective doses of pertussis vaccine should be excluded for 14 days after the last exposure to the infectious case, or until they have taken 5 days of a course of effective antibiotic treatment
Poliomylitis*	Exclude for at least 14 days from onset. Re-admit after receiving medical certificate of recovery	Not excluded
Ringworm, scabies, pediculosis (head lice)	Exclude until the day after appropriate treatment has commenced	Not excluded
Rubella* (German measles)	Exclude until fully recovered or for at least four days after the onset of rash	Not excluded
Salmonella, Shigella	Exclude until there has not been a loose bowel motion for 24 hours	Not excluded
Severe Acute Respiratory Syndrome (SARS)	Exclude until medical certificate of recovery is produced	Not excluded unless considered necessary by the Secretary
Streptococcal infection (including scarlet fever)	Exclude until the child has received antibiotic treatment for at least 24 hours and the child feels well	Not excluded
Tuberculosis	Exclude until receipt of a medical certificate from the treating physician stating that the child is not considered to be infectious	Not excluded
Typhoid fever (including paratyphoid fever)	Exclude until approval to return has been given by the Secretary	Not excluded unless considered necessary by the Secretary
Verotoxin producing Escherichia coli (VTEC)	Exclude if required by the Secretary and only for the period specified by the Secretary	Not excluded
Worms (Intestinal)	Exclude until there has not been a loose bowel motion for 24 hours	Not excluded

Statutory rule

A person in charge of a primary school or children's services centre must not allow a child to attend the primary school or children's services centre for the period or in the circumstances:

(a) specified in column 2 of the table in Schedule 7 if the person in charge has been informed that the child is infected with an infectious disease listed in column 1 of the table in Schedule 7; or
(b) specified in column 3 of the table in Schedule 7 if the person in charge has been informed that the child has been in contact with a person who is infected with an infectious disease listed in column 1 of the table in Schedule 7.

The person in charge of a primary school or children's services centre, when directed to do so by the Secretary, must ensure that a child enrolled at the primary school or children's services centre who is not immunised against a vaccine preventable disease (VPD) specified by the Secretary in that direction, does not attend the school or centre until the Secretary directs that such attendance can be resumed. (Note—VPDs marked in bold with an asterisk (*) require the department to be informed immediately. Contact the department on 1300 651 160 for further advice about exclusion and these diseases.)

Further information

For further information about exclusions mentioned in this document, please contact the Department of Health's Communicable Disease Prevention and Control Section on 1300 651 160 or visit ideas.health.vic.gov.au

Department of Health

ATTACHMENT 2

Head lice notification letter

Dear parents/guardians,

It has come to our attention that head lice or lice eggs have been detected in your child's group at North Brighton Kindergarten and we seek your co-operation in checking your child's hair regularly throughout this week, _____(Date).

Head lice are common in children and are transmitted by having head-to-head contact with someone who has head lice, but they do not transmit infectious diseases.

What can you do?

We seek your co-operation in checking your child's hair and, in instances where head lice or lice eggs are found, treating your child's hair.

While head lice do not spread disease, they are included in the Department of Health's exclusion table which defines the minimum period of exclusion from a children's service for children with infectious diseases. According to this table, where a child has head lice, that child must be excluded until the day after appropriate treatment has commenced.

We request that you observe these exclusion periods if head lice or lice eggs are detected on your child.

How do I treat my child for head lice?

Please read the attached pamphlet *Treating and controlling head lice* from the Department of Health. This contains guidelines regarding detecting and treating head lice and lice eggs. Additional information is also available by contacting the service.

Who do I contact if my child has head lice?

If head lice or lice eggs are found in your child's hair, you must inform:

- the service, and use the attached form to advise when treatment has commenced
- parents/guardians and carers of your child's friends so that they can also check these children for head lice or lice eggs and commence treatment if necessary.

When can my child return to the service?

Department of Health regulations require that where a child has head lice, that child must be excluded until the day after appropriate treatment has commenced.

North Brighton Kindergarten is aware that head lice can be a sensitive issue and is committed to maintaining your confidentiality.

Kind regards,

ATTACHMENT 3

Procedures for infection control relating to blood-borne viruses

This procedure is based on information available from the Department of Education and Training (DET), the Victorian Government's Better Health Channel and the National Health and Medical Research Council.

Important note on blood spills

Equipment and procedures for responding to incidents that present blood-borne virus hazards

CLEANING AND REMOVAL OF BLOOD SPILLS

Equipment (label clearly and keep in an easily accessible location)

- Disposable gloves
- Disposable plastic bags/zip lock bags/bio hazard container (if available)
- Detergent/bleach
- Disposable towels
- Access to warm water

Procedure

1. Put on disposable gloves.
2. Cover the spill with paper towels.
3. Carefully remove the paper towel and contents.
4. Place the paper towels in an appropriate disposable plastic bag/zip lock bag/bio hazard container.
5. Clean the area with warm water and detergent/bleach, then rinse and dry.
6. Remove and place gloves in an appropriate disposable plastic bag/zip lock bag/bio hazard container, seal and place it in a rubbish bin inaccessible to children.
7. Wash hands in warm, soapy water and dry (follow the *Handwashing guidelines* in the *Hygiene Policy*).

PROVIDING FIRST AID FOR CHILDREN WHO ARE BLEEDING

Equipment (label clearly and keep in an easily accessible location)

- Disposable plastic bags/zip lock bags/bio hazard container (if available)
- Disposable gloves
- Waterproof dressings
- Disposable towels
- Detergent
- Access to warm water

Procedure

1. Before treating the child, you must cover any cuts, sores or abrasions on your hands and arms with waterproof dressings.
8. Put on disposable gloves.
9. When cleaning or treating a child's face that has blood on it, ensure you are not at eye level with the child as blood can enter your eyes/mouth if the child cries or coughs. If a child's blood enters your eyes, rinse them while open, gently but thoroughly for at least 30 seconds. If a child's blood enters your mouth, spit it out and then rinse the mouth several times with water.
10. Raise the injured part of the child's body above the level of the heart (if this is possible) unless you suspect a broken bone.
11. Clean the affected area and cover the wound with waterproof dressing.

12. Remove and place gloves in an appropriate disposable plastic bag/zip lock bag/bio hazard container, seal and place it in a rubbish bin inaccessible to children.
13. Wash hands in warm, soapy water and dry (follow the *Handwashing guidelines* in the *Hygiene Policy*).
14. Remove contaminated clothing and store in leak-proof disposable plastic bags. Give these bags to the parent/guardian for washing when the child is collected from the service.

SAFE DISPOSAL OF DISCARDED NEEDLES AND SYRINGES

Equipment (label clearly and keep in an easily accessible location)

- Disposable gloves
- Long-handled tongs
- Disposable plastic bags
- 'Sharps' syringe disposal container, or rigid-walled, screw-top, puncture-resistant container available for free from local council, who may also provide free training to staff on the collection of sharps
- Detergent/bleach

Procedure

1. Put on disposable gloves.
2. Do **not** try to re-cap the needle or to break the needle from the syringe.
3. Place the 'sharps' syringe disposal container on the ground next to the needle/syringe and open the lid.
4. Using tongs, pick the syringe up from the middle, keeping the sharp end away from you at all times.
5. Place the syringe, needle point down, in the 'sharps' syringe disposal container and close the lid securely on the container.
6. Repeat steps 3 to 5 to pick up all syringes and/or unattached needles.
7. Remove and place gloves in a disposable plastic bag, seal and place it in a rubbish bin inaccessible to children.
8. Clean the area with warm water and detergent/bleach, then rinse and dry.
9. Wash hands in warm, soapy water and dry (follow the *Handwashing guidelines* in the *Hygiene Policy*).

Under no circumstances should work-experience students, volunteers or children be asked or encouraged to pick up needles/syringes.

If the needle/syringe is not accessible and cannot be collected, mark and supervise the area so that others are not at risk, and contact the Syringe Disposal Helpline on 1800 552 355.

Advice on the handling and disposal of needles/syringes can be accessed from:

- the Syringe Disposal Helpline on 1800 552 355 (24 hours a day, 7 days a week) for the location of the nearest needle exchange outlet or public disposal bin
- the environmental officer (health surveyor) at your local municipal/council offices
- local general practitioners
- local hospitals.

Note: 'Sharps' syringe disposal containers and/or needles/syringes must not be put in normal waste disposal bins.

NEEDLE STICK INJURIES

The risk of transmission of a blood-borne virus from a needle stick injury is low and should not cause alarm. The following procedure should be observed in the case of a needle stick injury.

Procedure

1. Flush the injured area with flowing water.
2. Wash the affected area with warm soapy water and then pat dry.
3. Cover the wound with a waterproof dressing.

4. Report the injury to the Approved Provider or Nominated Supervisor as soon as possible.
5. Document needle stick injuries involving a staff member or child in the incident report book maintained at the service under OHS laws, and report to WorkSafe Victoria.
6. For incidents involving a child, contact the parents/guardians as soon as is practicable and provide a report to DET within 24 hours (refer to 'serious incident' in the *Definitions* section of this policy).
7. See a doctor as soon as possible and discuss the circumstances of the injury.
